June 10th 2016 – Immediate release

LaserMaxx Lasergames announces Windows 10 integration

First major laser tag manufacturer to adopt Microsoft's Windows 10

De Bilt, June 10th 2016 – Laser tag manufacturer LaserMaxx Lasergames announced today to its customers that the LaserMaxx user console is now integrated with Windows 10.

According to the European company this update ensures a stability for LaserMaxx customers for years to come. LaserMaxx owner Marcel Röhrs explains: “LaserMaxx customers may always expect three things from us. First: you will have the most durable professional laser tag system available. Second: all options and features are automated where humanly possible. Third: you will be ensured of the latest innovations in the laser tag industry. The integration with Windows 10 falls in that last category. We are happy to announce that we are the first leading laser tag manufacturer with this innovation, ensuring the stability of our customers for many years to come. We expect others to follow after. In the meantime, we will set our eye on new developments and continue leading the pack.”

According to Röhrs the integration with Windows 10 is available to all LaserMaxx customers, current or prospective.

Recreation activity

Laser tag is a popular and active recreation activity for groups and parties in which each participant receives a lasergun and a laservest. The goal of the game is to score points by tagging opponents and of course, avoid being tagged. In a lasertag location the game and the player perception receives an impulse by the addition of artistic UV-paintings and light-, sound- and smoke effects.

About LaserMaxx Lasergames
